## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election of Group III, in the reply filed on May 15, 2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

### ***Status of Claims***

2. Claims 1-24 and 26-38 are cancelled. Claim 25 is pending and under examination.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. The rejection of the claim as being anticipated by Agrawal et al.<sup>1</sup> is withdrawn in view of Applicant's submission.

5. Claim 25 is rejected under 35 U.S.C. 102(a) as being anticipated by Zhao et al.<sup>2</sup>

---

<sup>1</sup> Agrawal et al., U.S. Provisional Application No. 60/201578, which U.S. PreGrant Patent No. 20020132995 has priority.

The claim is directed at a method for modulating the immunostimulatory effect of an immunostimulatory oligonucleotide compound by introducing a 2'-O-methyl-ribonucleoside or 2'-5' linkage into the oligonucleotide.

Zhao et al. teaches method for modulating the immunostimulatory effect of an immunostimulatory oligonucleotide compound by introducing a 2'-O-methyl-ribonucleoside and 2'-5' linkage into the oligonucleotide. [Abstract and paragraph bridging left and right columns of page 1051, in particular.] Zhao et al. teaches the claimed invention. Hence, Zhao et al. anticipates the claimed invention.

6. Claim 25 is rejected under 35 U.S.C. 102(b) as being anticipated by Zhao et al.<sup>3</sup>

The claim is directed at a method for modulating the immunostimulatory effect of an immunostimulatory oligonucleotide compound by introducing a 2'-O-methyl-ribonucleoside linkage into the oligonucleotide.

Zhao et al. teaches method for modulating the immunostimulatory effect of an immunostimulatory oligonucleotide compound by introducing a 2'-O-methyl-ribonucleoside linkage into the oligonucleotide. [Abstract, in particular.] Zhao et al. teaches the claimed invention. Hence, Zhao et al. anticipates the claimed invention.

### ***Double Patenting***

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. The double patenting rejection is withdrawn in view of the terminal disclaimer, which has been approved by the Office.

***Conclusion***

9. No claims are allowed. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action.

10. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
